

IIFT 2015 (All Sets)

Answer key & Explanations

Question No's				key	Explanations									
Set A	Set B	Set C	Set D											
1.	103.	65.	29.	B	As Rahul has scored a total of 240 in 1 st 3 quizzes. So he has to get minimum 90 marks to get his average more than 80. In order to get minimum 90 marks, he has to get either 9 questions or 10 questions correct. For getting 9 questions correct, there are 10 cases. For getting all 10 correct, there is only 1 case. So total 11 cases. Hence probability = $\frac{11}{1024}$									
2.	104.	66.	30.	C	Going by options, if Rohini was born in 1995, then she was 9 years old in 2004. So Arvind was 3 years old in 2004. After 10 years, Rohini was 19 years old and Arvind was 13 years old. Hence the difference of their ages was 6									
3.	105.	67.	31.	A	Going by option, 1 st option satisfies the given criteria. Hence answer is option A.									
4.	106.	68.	32.	C	$\text{Log}_{25} 5 = a \Rightarrow a = \frac{\log 5}{\log 25} = \frac{\log 5}{2 \log 5} = \frac{1}{2}$ $\text{Log}_{25} 15 = b \Rightarrow b = \frac{\log 15}{\log 25} = \frac{\log 3 + \log 5}{2 \log 5}$ $\Rightarrow b = \frac{\frac{\log 3}{\log 5} + 1}{2}$. $\text{Log}_{25} 27 = \frac{\log 27}{\log 25} = \frac{3 \log 3}{2 \log 5} = ?$ Also $\frac{\log 3}{\log 5} = 2b - 1 \Rightarrow \frac{3}{2}(2b - 1) = 3b - \frac{3}{2} = 3\left(b - 1 + \frac{1}{2}\right) = 3(b - 1 + a)$ Hence answer is C option									
5.	107.	69.	33.	C	Two people are not sitting together means Total – (sitting together) $\Rightarrow 10! - (9! \cdot 2!) = 2903040$. Hence answer is option C.									
6.	108.	70.	34.	C	<table border="1" style="margin-left: auto; margin-right: auto;"> <tr> <td></td> <td>AT</td> <td>VF</td> </tr> <tr> <td>Pre</td> <td>79</td> <td>100</td> </tr> <tr> <td>Post</td> <td>88.48</td> <td>85</td> </tr> </table> \Rightarrow reqd. percentage $\Rightarrow \frac{89 - 85}{85} \times 100 \Rightarrow \frac{4}{85} \times 100 = 4.7\%$ more Hence answer is C option.		AT	VF	Pre	79	100	Post	88.48	85
	AT	VF												
Pre	79	100												
Post	88.48	85												
7.	109.	71.	35.	B	Let's take original service charges = 100 Rs. So 2 nd service costs = 90, 3 rd service costs = 80.1. 4 th service costs 70.488 and 5 th service costs 55. So total cost = 395.588 So net discount offered = $\frac{104}{500} \times 100 = 20.8\%$ Hence the answer is option B									
8.	110.	72.	36.	D	Let there be x inlet pipes. Hence there would be 11 – x outlet pipes. So as per the question, $\frac{x}{7} - \frac{11-x}{5} = -\frac{1}{7} \Rightarrow x = 6$ So answer is D option.									
9.	111.	73.	37.	A	Let total families be 100. Since 68 families neither own agricultural land nor mobile, so 32 families own at least one of the two things. Let x be the number of families owning both. So $22 + 18 - x = 32 \Rightarrow x = 8$ So if both is 8, total is 100									

					If both is 1600, total is $\frac{100}{8} \times 1600 = 20000$ Hence the answer option A.
10.	112.	74.	38.	D	Let n be the number of members who attended the board meeting. So as per the question ${}^nC_2 = 78 \Rightarrow n = 13$. Hence the answer option is D
11.	113.	75.	39.	B	Let's say x pages give us the equal cost for both printers. So $5000 + 1.8x = 8000 + 1.5x \Rightarrow x = 10000$. The cost of laser printer decreases when x exceeds 10000. So this is the minimum value so answer is B option.
12.	114.	76.	40.	C	Length of arc = 10π . So $\frac{2\pi r \times 90}{360} = 10\pi$ $\Rightarrow r = 20$ Area of sector = $\pi r \frac{Q}{360}$ $\Rightarrow \pi \times 400 \times \frac{90}{360} = 100\pi$
13.	115.	77.	41.	B	Morning speed = 100kmph. Evening speed = 150kmph Morning time = 1hr. evening time = 1.5hrs Distance in the morning = $100 \times 1 = 100$ km Distance in the evening = $150 \times 1.5 = 225$ km Average speed for entire journey is = $\frac{100 + 225}{1 + 1.5} = \frac{325}{2.5} = 130$ kmph Average speed in morning = $\frac{100}{1} = 100$ kmph $\Rightarrow 1^{st}$ value is 30% greater.
14.	116.	78.	42.	D	Let O be the centre of the circle and AB is height of cylinder construct the triangle OAC $\triangle OCA$ is a right angled triangle and $OA = 8$, $OC = 7$, Let $AC =$ radius of cylinder = r In $\triangle OCA$, $OA^2 = OC^2 + AC^2$ $\Rightarrow 8^2 = 7^2 + AC^2$ $\Rightarrow AC^2 = 64 - 49 = 15$ $\Rightarrow r^2 = 15$. The volume of cylinder = $\pi r^2 h$ $= \frac{22}{7} \times 15 \times 14 = 660$
15.	117.	79.	43.	C	The salary of seema = Rs. 300. The savings for 1st three months = 900. The saving for next month = 350, 400, 450, 500, 11400 - 900 = 10500 Hence $10500 = \frac{n}{2} [2 \times 350 + (n-1) \times 500]$ $21000 = n [650 + 50n]$ $\Rightarrow 50n^2 + 60n - 21000 = 0$ $\Rightarrow n^2 + 13n - 420 = 0$ $\Rightarrow n^2 + 28n - 15n - 420 = 0$ $\Rightarrow n(n+28) - 15(n+28) = 0$ $(n+28)(n-15) = 0$ $n = 15, -28$, Rejecting the negative value of n, we get $n = 15$. Hence the total months are $15 + 3 = 18$.
16.	118.	80.	44.	D	Let the total sales are of Rs. X. The commission for Rs. 100000 = Rs. 6000 The remaining amount = $x - 100000$ The commission on this amount = $\frac{5}{100}(x - 100000) = 0.05x - 5000$ Now he deposited Rs. 265000 after deducting his commission. $\therefore x - (0.05x - 5000) - 6000 = 265000$

					$\Rightarrow x - 0.05x + 5000 - 6000 = 265000$ $\Rightarrow 0.95x = 266000$ $\Rightarrow x = \text{Rs. } 280000$ Hence the total sales are worth Rs. 280000.																		
17.	119.	81.	45.	B	P can do the job in 42 days. Q is 26% more efficient than P $\Rightarrow 1.26Q = 42 \Rightarrow Q = 33$ days As R is 50% more efficient than Q $\Rightarrow R$ will take 22 days. Hence Q can do the work in 33 days & R can do it in 22 days, when Q and R will do the work together, they will do $\frac{1}{33} + \frac{1}{22} = \frac{2+3}{66} = \frac{5}{66}$ work in one day. So they will take $\frac{66}{5} = 13.2$ days to complete the work.																		
18.	120.	82.	46.	A	As P and Q are mixed in 1:4.5, let us take P = 100 kg & Q = 450kg. In 100kg P, the silver = 45kg & Aluminum = 55kg. In 450kg Q, the silver = 135kg and copper = 157.5kg. Hence the total silver in the new alloy = 135 + 45 = 180kg and copper = 157.5kg. %age of silver = $\frac{180}{550} \times 100 = 32.72 \approx 33\%$ %age of copper = $\frac{157.5}{550} \times 100 = 28.63 \approx 29\%$																		
19.	121.	83.	47.	B	 <p>Using Pythagoras theorem, We get $x = 4.1\text{m}$ So $x - 1.2 = 2.9\text{m}$ $\Rightarrow (7.6)^2 = (2.9)^2 + (y + 6.4)^2 \Rightarrow y = 0.6\text{m}$.</p>																		
20.	122.	84.	48.	D	The given equation is $\sqrt{4x-9} + \sqrt{4x+9} = 5 + \sqrt{7}$. Just put $x = 4$ in the above equation, we get $\sqrt{4 \times 4 - 9} + \sqrt{4 \times 4 + 9} = 5 + \sqrt{7}$ $= 5 + \sqrt{7} = 5 + \sqrt{7}$ which is true.																		
21.	123.	85.	49.	B	$\left\{ \frac{4^{p+\frac{1}{4}} \times \sqrt{2 \times 2^p}}{2 \times \sqrt{2^{-p}}} \right\}^{\frac{1}{p}} = \left\{ \frac{4^p \times 4^{\frac{1}{4}} \times 2^{\frac{1}{2}} \times 2^{\frac{p}{2}}}{2 \times 2^{-\frac{p}{2}}} \right\}^{\frac{1}{p}}$ $= \left\{ 2^{2p} \times 2^{\frac{1}{2}} \times 2^{\frac{1}{2}} \times 2^{\frac{p}{2}} \times 2^{-1} \times 2^{\frac{p}{2}} \right\}^{\frac{1}{p}} = \left(2^{2p+p} \right)^{\frac{1}{p}} = \left(2^{3p} \right)^{\frac{1}{p}} = 2^3 = 8.$																		
22.	124.	86.	50.	A	The probability of failing the first trimester is 0.08. So the probability of passing the first trimester = 0.92. The combined probability of passing second and third trimester is 0.87. Hence the probability that the student will complete the first year = $0.92 \times 0.87 = 0.8$.																		
23-27.	1-5.	87-91.	51-55.		<table border="1"> <tbody> <tr> <td>Anthony</td> <td>Electrical</td> <td>Singapore</td> </tr> <tr> <td>Dinesh</td> <td>Metallurgy</td> <td>UAE</td> </tr> <tr> <td>Frank</td> <td>IT</td> <td>Australia</td> </tr> <tr> <td>Brad</td> <td>Chemical</td> <td>India</td> </tr> <tr> <td>Evan</td> <td>Mechanical</td> <td>England</td> </tr> <tr> <td>Carla</td> <td>Electronics</td> <td>Germany</td> </tr> </tbody> </table>	Anthony	Electrical	Singapore	Dinesh	Metallurgy	UAE	Frank	IT	Australia	Brad	Chemical	India	Evan	Mechanical	England	Carla	Electronics	Germany
Anthony	Electrical	Singapore																					
Dinesh	Metallurgy	UAE																					
Frank	IT	Australia																					
Brad	Chemical	India																					
Evan	Mechanical	England																					
Carla	Electronics	Germany																					

23.	1.	87.	51.	C	As per the table, we get the information that Carla joined the Electronics Deptt.
24.	2.	88.	52.	C	The person placed in UAE is in Metallurgy Department.
25.	3.	89.	53.	B	Out of these, Brad-India – Chemical is the correct combination.
26.	4.	90.	54.	A	Frank joined IT Deptt. In Australia.
27.	5.	91.	55.	D	UAE – Metallurgy is true for Dinesh.
28.	6.	92.	56.	C	
29-32.	7 – 10.	93 – 96.	57 – 60.		Qualified: - Kranti > Kalpna > Kamlesh > Kriti > Kamla > Kripa Height: - Kripa > Kamla > kamlesh > kriti > Kalpna > Krianti
29.	7.	93.	57.	B	Kamlesh is third tallest in decreasing order of height.
30.	8.	94.	58.	D	Kranti is most qualified.
31.	9.	95.	59.	B	Kriti is 3 rd in increasing order of qualification.
32.	10.	96.	60.	B	Kamla is 5 th in increasing order of height.
33.	11.	97.	61.	B	18, 37, 76, 155, 314, 633, 1272 $x^2 + 1, x^2 + 2, x^2 + 3, x^2 + 4, x^2 + 5, x^2 + 6$
34.	12.	98.	62.	C	Number of ways for selecting countries if no condition are imposed will be $2^3 - 1 = 7$. As for each country these are 2 ways i.e. to select or not selecting it. So options C.
35.	13.	99.	63.	D	We can select a maximum of all 3 countries if condition 1 is met with. As per the condition USA & UAE both have to be selected. So we can only select USA & UAE or select all 3. So option D.
36.	14.	100.	64.	B	Either 2 or 1 countries can be selected if only conditions 2 & 3 are complied with Those could be one among USA or UK or If UK is selected then UAE is also selected. So option B
37.	15.	101.	65.	C	Checking through the choices for the relationship between w and X as niece and uncle we find choice C to be correct checking C. <div style="text-align: center;"> <pre> X (male) ----- Brothers ----- Y (male) v Z ----- W (Daughter) </pre> </div> <p>Since, W is daughter of y and x is brother of y. So, w is niece of x.</p>
38.	16.	102.	66.	C	Making the diagram as per given instructions <div style="text-align: center;"> </div> <p>Now, From the diagram it is clear that the distance between starting point A and end point B is 5 miles using Pythagoras therm.</p>
39.	17.	103.	67.	D	<div style="text-align: center;"> </div> <p>So, no conclusion precisely follows. Hence, None of these</p>

40-42.	18-20.	104-106.	68-70.		As per the given condition we can draw a flow chart.																																																																	
					<pre> graph LR S((S)) <--> U((U)) U <--> V((V)) V <--> T((T)) U <--> Q((Q)) Q <--> R((R)) R <--> T </pre>																																																																	
40.	18.	104.	68.	C	Now we can say that only 2 cities U & V are crossed to reach T from S.																																																																	
41.	19.	105.	69.	B	Longest route from P to U is P - Q - R - T - V - U. So, 4 cities are crossed in the route except P & U.																																																																	
42.	20.	106.	70.	C	Checking the option with the diagram we can observe that connecting U to Q with 2 way connection minimizes the transit cities. Hence option C.																																																																	
43-47.	21-25.	107-111.	71-75.		<table border="1"> <thead> <tr> <th>Sales in Month</th> <th>April</th> <th>May</th> <th>June</th> <th>July</th> <th>Aug</th> <th>Sep</th> <th>Oct</th> <th>Nov</th> <th>Dec</th> <th>Jan</th> <th>Feb</th> <th>March</th> </tr> </thead> <tbody> <tr> <td>2 Ton</td> <td>253</td> <td>253</td> <td>318</td> <td>323</td> <td>402</td> <td>259</td> <td>324</td> <td>325</td> <td>325</td> <td>332</td> <td>415</td> <td>418</td> </tr> <tr> <td>1.5 Ton</td> <td>240</td> <td>240</td> <td>420</td> <td>426</td> <td>246</td> <td>246</td> <td>428</td> <td>429</td> <td>429</td> <td>439</td> <td>254</td> <td>256</td> </tr> <tr> <td>1 Ton</td> <td>177</td> <td>177</td> <td>152</td> <td>155</td> <td>440</td> <td>181</td> <td>337</td> <td>338</td> <td>156</td> <td>346</td> <td>455</td> <td>459</td> </tr> <tr> <td>0.5 Ton</td> <td>595</td> <td>595</td> <td>381</td> <td>387</td> <td>207</td> <td>609</td> <td>207</td> <td>208</td> <td>390</td> <td>213</td> <td>214</td> <td>216</td> </tr> </tbody> </table>	Sales in Month	April	May	June	July	Aug	Sep	Oct	Nov	Dec	Jan	Feb	March	2 Ton	253	253	318	323	402	259	324	325	325	332	415	418	1.5 Ton	240	240	420	426	246	246	428	429	429	439	254	256	1 Ton	177	177	152	155	440	181	337	338	156	346	455	459	0.5 Ton	595	595	381	387	207	609	207	208	390	213	214	216
Sales in Month	April	May	June	July	Aug	Sep	Oct	Nov	Dec	Jan	Feb	March																																																										
2 Ton	253	253	318	323	402	259	324	325	325	332	415	418																																																										
1.5 Ton	240	240	420	426	246	246	428	429	429	439	254	256																																																										
1 Ton	177	177	152	155	440	181	337	338	156	346	455	459																																																										
0.5 Ton	595	595	381	387	207	609	207	208	390	213	214	216																																																										
43.	21.	107.	71.	B	Required Average = $\frac{240 + 240 + 420 + 426 + 246 + 246 + 428 + 429 + 429 + 439 + 254 + 256}{12} = 338$																																																																	
44.	22.	108.	72.	A	Absolute difference between average annual sales in highest for 1 ton AC and ½ ton AC.																																																																	
45.	23.	109.	73.	C	1.5 ton AC has performed the second best in half yearly sales performance.																																																																	
46.	24.	110.	74.	D	In February 2015, total WAC monthly sales performance was the highest.																																																																	
47.	25.	111.	75.	D	2 ton AC has least Sales volatility.																																																																	
48.	26.	112.	76.	C	The total sales of product B = 5800 The average sales of product B = $\frac{5800}{7} = 828.57$ The difference between average of A and B is 214.29 \therefore Average of A = 214.29 + 828.57 = 1042.86 Hence the total of A = 1042.86 × 7 = 7300 Let the value of A in 2013 = x crore The total of A from table = 6800 + x $\therefore 6800 + x = 7300 \Rightarrow x = 500$ \therefore sales of A in 2013 = Rs. 500 crore The difference between the average of B and C = -342.86 crore \therefore Average of C = 828.57 + 342.86 = 1171.43 crores Hence total of C = 1171.43 × 7 = Rs. 8200 crore Let the sales of C in 2010 = Rs. y crore The total of C from table = 7400 + y $\Rightarrow 7400 + y = 8200 \Rightarrow y = 800$ \therefore Sales of C in 2010 = Rs. 800 crore The difference between the average of B and D = - 71.43 crore \therefore Average of D = 828.57 + 71.43 = 900 crore Hence total of D = 900 × 7 = Rs. 6300 crore Let the sales of D in 2012 = Rs. Z crore The total sales of D from table = 5700 + Z $\Rightarrow 5700 + Z = 6300$ $\Rightarrow Z = Rs 600$ crore.																																																																	

49.	27.	113.	77.	B	The total sales of all products in 2010 = Rs. 4700 crore The total sales of all products in 2011 = Rs. 4200 crore. The total sales of all products in 2012 = Rs. 4500 crore. The total sales of all products in 2013 = Rs. 4400 crore. Since the sales in 2011 is minimum, so average in also minimum in 2011.																									
50.	28.	114.	78.	B	The total sales of products A, B, D and E are Rs. 7300 crore, Rs. 5800 crore, Rs. 63 crore & Rs. 7000 crore respectively. Since the sales of product B are minimum. Hence its average will also be minimum.																									
51.	29.	115.	79.	D	The difference between the average sales of product D and product E is Rs. 100 crore, which is least.																									
52.	30.	116.	80.	B	The Year on year growth in 2010 -																									
53.	31.	117.	81.	D	<table border="1"> <thead> <tr> <th></th> <th>2014</th> <th>2012</th> <th>2010</th> <th></th> </tr> </thead> <tbody> <tr> <td>A. innovation</td> <td>0.30×4.5 +</td> <td>0.35×4 +</td> <td>0.35×4.75</td> <td>= 4.4125</td> </tr> <tr> <td>B. 57.	35.	121.	85.	D	Least cost/ad Website A = 27% of 5, 57, 000 / 240,000 = 64.8 × 5,57,000/1000 Website B = 22% of 5,57,000 / 370,000 = 81.4 × 5,57,000/1000 Website D = 13% of 5,57,000 / 300,000 = 39 × 557000/1000 Website E = 20% of 5,57,000 / 150,000 = 30 × 557000/1000																									
58.	36.	122.	86.	D	Max. Quality Traffic																									

					Website A = $2800 / 120,000 = 0.0233$ Website B = $2500 / 60,000 = 0.0416$ Website D = $3000 / 80000 = 0.0375$ Website E = $3500 / 40,000 = 0.0875$
59.	37.	123.	87.	C	Max. Leakage Website B = $1 - \frac{1200}{2500} = 1 - 0.48 = 0.52$ Website C = $1 - \frac{900}{2000} = 1 - 0.45 = 0.55$ Website D = $1 - \frac{1300}{3000} = 1 - 0.43 = 0.57$ Website E = $1 - \frac{1600}{3500} = 1 - 0.457 = 0.542$
60.	38.	124.	88.	A	Most efficiency Website A = $2700 / 27\% = 100$ Website B = $1200 / 22\% = 54.54$ Website C = $900 / 18\% = 50$ Website E = $1600 / 20\% = 80$
61.	39.	1.	89.	C	Para 5,4th Line: Arcelor - the world's most profitable steel company. Option B ruled out. Therefore Option D ruled out. Option A is not true, Refer to 3rd Para, 2 nd Line (SINCE 2003, and not In 2003) Hence, the correct answer is Option C
62.	40.	2.	90.	D	Para 6, 3 rd Line (Dominating the market... Either firm to increase its pricing position with customers)
63.	41.	3.	91.	B	Para 5, Line 5, (Its nearest rival, Arcelor...) Option A (The passage does not talk about Arcelor & its shareholders; Option C is false as the Steel industry had recovered from the crises by 2005; Option D this line is nowhere mentioned in the passage
64.	42.	4.	92.	C	Option C is directly stated in 1 st Para, Last Line & 2 nd Para 1 st Line
65.	43.	5.	93.	B	2 nd Para, Last Line (In an era.... to suggest that the advent of the internet ranks...)
66.	44.	6.	94.	C	Option A ruled out.. look at 3 rd Para, 1 st Line (While Outlet did not...) In the very same line, it is mentioned that his vision looks nothing short of Prophetic; hence Option C is the correct choice
67.	45.	7.	95.	B	Option B is clearly mentioned in Para 6, 3 rd Line (Each shared a commitment to social transformation...)
68.	46.	8.	96.	D	Para 4 talks about Outlet's idea being Futuristic, Visionary and Utopian. Hence, Option D is the correct choice
69.	47.	9.	97.	C	In most of the passage the author is talking about the mentioned issue.
70.	48.	10.	98.	A	Refer para 5, line 2 "mortal hazards arises He had insurance coverage."
71.	49.	11.	99.	C	Refer para 4, line 2 "in the recent years... socializing private risk."
72.	50.	12.	100.	C	Refer para 4, 4 th line from the bottom "in effect ... mistakes."
73.	51.	13.	101.	A	From the overall reading of the passage only option 1 can be implied.
74.	52.	14.	102.	C	Refer the first paragraph "first, the impact... has declined.."
75.	53.	15.	103.	D	From the overall reading of the passage, the answer can be easily deduced.
76.	54.	16.	104.	C	Refer para 5, line 6 - "the pluralist view ... terms."
77.	55.	17.	105.	C	The opening line of the passage has already been given. this will be followed by statement p "one argument Universe." Statement S forms a mandatory pair with statement P "another argument God." This is to be followed by Q- "he Technique Thus the sequence is RPSQ.
78.	56.	18.	106.	A	S1 has been mentioned as the opening sentence. Statement S follows the opening sentence most logically, One day..... Bazaar. It is to be followed by statement P "on the way..... watered. Since P and R form a pair, the next statement R "but..... Still will follow. Thus the sequence should be SPRQ
79.	57.	19.	107.	D	It means to emphasize
80.	58.	20.	108.	A	It means to have an end to serve
81.	59.	21.	109.	D	To get carried away is defined as to become overly excited or involved and to take things too far, Carry on means to continue despite difficulties; Carry out means to bring to a successful issue or complete
82.	60.	22.	110.	A	Hang Over means a severe headache or other after-effects caused by drinking an excess of alcohol. Hang up one's boots means to give up a sport permanently; Hang around means to roam around freely; Hanging on to each word means everything you say is being thought over and absorbed by the person reading or

					listening
83.	61.	23.	111.	C	In the second blank, the use of "from" suggests that the terrain is different from that of Europe.
84.	62.	24.	112.	C	the 1 st part of the sentence refers to the processes that go beyond our reason, hence the most appropriate choice is "defied"
85.	63.	25.	113.	C	Milieu means a person's social environment
86.	64.	26.	114.	A	Gaffe means an unintentional act or remark causing embarrassment to its originator; a blunder
87.	65.	27.	115.	D	Emancipated means to free from restraint, control, or the power of another; <i>especially</i> : to free from bondage; Enunciated means to make a definite or systematic statement Elevated means raised especially above the ground or other surface; Emaciated means abnormally thin or weak, especially because of illness or a lack of food.
88.	66.	28.	116.	C	We always use "from" with remove
89.	67.	29.	117.	B	Qualm means a feeling of uneasiness about a point especially of conscience or propriety
90.	68.	30.	118.	C	Because of the Preposition "TO" we can only use the word Alternative in the 1 st blank. And in the second Blank we are talking about the risk of lung & mouth cancers, Hence, Option C is the correct answer
91.	69.	31.	119.	B	Conspiracy has to be planned secretly, " Clandestine " means secretly
92.	70.	32.	120.	B	You can't be natural if you are acting.
93.	71.	33.	121.	D	All of these are applicable
94.	72.	34.	122.	B	Since, the word 'Although' has been used; the next segment should about something similar but of a lesser degree. Hence, Option B is the correct choice
95.	73.	35.	123.	A	Cacophony means a harsh discordant mixture of sounds & Euphony means the quality of being pleasing to the ear. Both are sound patterns used in verse to achieve opposite effects: euphony is pleasing and harmonious. Similarly, Nocturnal and Diurnal are opposites. Further, both pairs cannot be associated with human qualities
96.	74.	36.	124.	B	Blasphemy is the act of insulting or showing contempt or lack of reverence, hence the correct answer is Option B (Reverent which means respectful)
97.	75.	37.	1.	A	
98.	76.	38.	2.	D	
99.	77.	39.	3.	A
